

5 Why Not PowerApps? Factors to Consider

1 IS IT AFFORDABLE?

Hot Tip: Check What's Included

When considering a switch to a new software application, be sure to review the fine print on inclusions. For example, Office 365 includes the basic PowerApps software. However, you need to pay for advanced capabilities. Premium Connectors, On-Premises connections, Portal Licenses, Power Automate, and many other features are not included with Office 365.

It can be hard to budget for an application that has an escalating cost structure with hidden fees. With NITRO Studio, we provide affordable, flat rates with unlimited sites, forms, and workflows to make budgeting easier.

Ok, How Much Would I Have to Pay?

\$ POWERAPPS UNLIMITED

100 USERS	x	\$20/USER/MONTH	=	\$2,000/MONTH
250 USERS	x	\$20/USER/MONTH	=	\$5,000/MONTH
500 USERS	x	\$20/USER/MONTH	=	\$10,000/MONTH

\$ NITRO STUDIO UNLIMITED

\$399/MONTH
\$699/MONTH
\$1,074/MONTH

WOW!
NITRO Studio provides the same features as the PowerApps Unlimited Plan (plus more) for just a fraction of the cost!

2 IS IT COMPREHENSIVE?

PowerApps is Not All-Inclusive

The licensing model has multiple plans, which users may struggle to understand. Also, Microsoft 365 licensing restricts certain connectors to higher tiers, costing even more money.

YOU NEED TO SEPARATELY PURCHASE:

POWERAPPS

POWER AUTOMATE

POWER BI

Power Apps, Power Automate, Power BI, and the Power Portal are separate components that act alongside each other to form a business process automation solution.

NITRO Studio is a comprehensive and complete business process automation platform including:

FORMS DESIGNER

CUSTOM ACTIONS

WORKFLOWS

REPORTS

BONUS:
NITRO Studio fully integrates with Microsoft Teams to connect your organization on every level.

3 IS IT SUPPORTED?

Hot Tip: Check Your Support Structure

When considering a switch to a new software application, be sure to review your future support needs. Large organizations like Microsoft have an outsourced, impersonal approach to support their large customer base. Crow Canyon has a qualified in-house team to support your apps forever.

POWERAPPS

Lacks dedicated support. An outside consultant is often hired or an in-office team member will need to be trained as well as tasked with maintaining the application. This is a concern for many IT teams.

VS NITRO STUDIO

Fully dedicated Support Team to help our customers create, build, and maintain application lifecycle management. But don't just take our word for it, here's what our customers have to say...

"Crow Canyon's support is stellar! Fast response, always willing to schedule meetings in a timely manner to resolve any issues we've had."
- Hammer Residencies

"The overall experience has been incredible. Crow Canyon Software provides excellent training, support, and implementation."
- 0365 Product Manager

Ongoing Support Needed

ONGOING APPLICATION SUPPORT

After an application is built and deployed, it needs to be supported. End-users will have questions and support issues. The application will need to be maintained, enhanced, and upgraded.

Once developed, who will support it? Quite often, the "citizen developer" moves on to other tasks or even leaves the organization. What then?

With Crow Canyon, you are covered!
Crow Canyon provides the support resources you need throughout the application's lifecycle.

Who You Gonna Caw-L?

Crow Canyon is known for providing a high-level of support and training to customers. Our goal is to provide excellent support to all our customers, with easy access to many support and training options online.

- WEBINARS & WORKSHOPS

4 IS IT EASY TO LEARN?

NITRO STUDIO'S COMPLETE TRAINING

TRAINING

MANUALS

VIDEOS

WORKSHOPS

"The Crow Canyon Software Support Team is always available to walk me through the final stage of my workflow and business process automation - I'm usually about 80% there, and with a quick chat or call from support, I can finish it."
- SPOKANE HEALTH, IT MANAGER

Crow Canyon consistently receives praise for our timely, personable support. Here's what one customer had to say about their DIY project development...

Easy to learn, easy to use!

Creating modern, efficient solutions for your company can be overwhelming at times. You want a platform that makes it easy and intuitive to build low-code/no-code applications.

Many people have found PowerApps difficult and confusing to use for anything more than the simplest purposes. NITRO Studio was intentionally built for ease of use while including sophisticated capabilities.

NITRO Studio's training resources will bring you up to speed quickly so you can start solving business process issues at your organization right away!

TOP CHOICE
Our customers say talking with our support team makes all the difference when seeking help.

5 DOES IT RUN ON BOTH?

YES!

NITRO Studio runs in Office 365 and SharePoint 2013, 2016, and 2019 for greater functionality and reach.

NO...

PowerApps only runs on the Office 365 cloud, limiting options for on-premises users and organizations.
