Provide focused search results by using AI with your existing documents and policies
Benefit from integrations that drive workflows and automation for increased efficiency

Drive Team Workflow

Feedback Loop fosters continuous improvement

About the Architecture

OUTPUT

Delivers Answers
Initiates Workflows

AI Assistant provides concise accurate responses

USER ENGAGEMENT

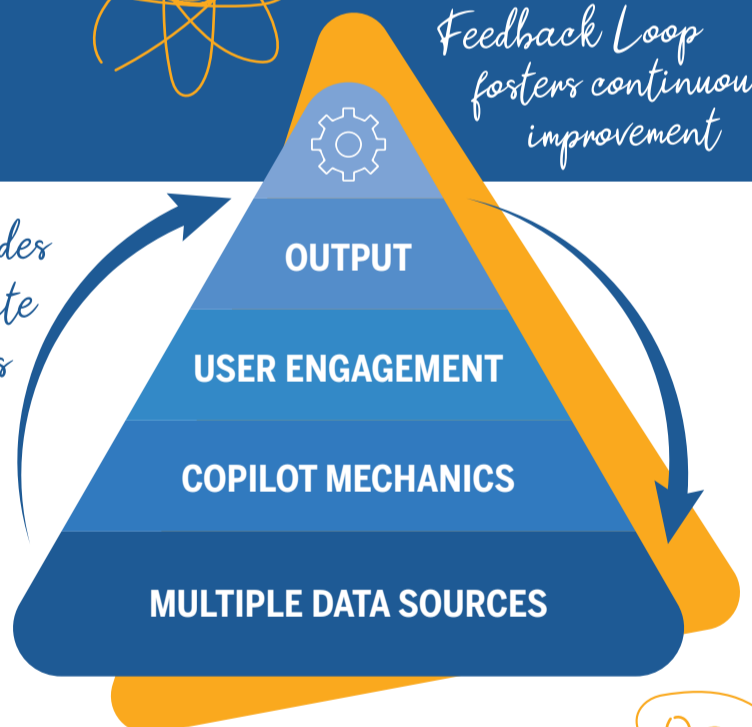

Friendly Interfaces on Different Devices. "Prompting" Assistance.

COPILOT MECHANICS

LLM and Code that Powers the GPT.
Vectorization, Integrations, Fine-Tuning

MULTIPLE DATA SOURCES

Many Formats (PDF, Manuals, Web, FAQs, etc.)
Many Locations (OneDrive, File Systems, AWS, etc.)

Take Control of Your AI Technology

TARGETED DATA SET

With NITRO Copilot, you designate a specific set of data such as documents, FAQs, manuals, KBs, and other sources.

By using a targeted data set, NITRO Copilot uses AI technology effectively and securely without allowing any internal data to be used in training Large Language Models (LLMs).

NITRO Copilot gives you the control you need!

INTEGRATIONS

NITRO Copilot integrates with our Request Manager and NITRO Help Desk.

Questions or requests that are not answered by the Copilot can become tickets in an organized system for fulfillment.

This provides an end-to-end solution for managing requests, questions, and issues for any department in your organization.
