

PROJECT MANAGER

The best comprehensive solution used by organizations around the world!

EASY COLLABORATIVE PLATFORM FOR ALL PROJECT LEVELS

Managing projects is often a secondary responsibility, undertaken when needed. For these part-time project managers, scheduling a project can be confusing and inefficient.

It is hard to quickly input tasks where the detail is not fully known, adjust when tasks move unexpectedly, and schedule tasks manually. It requires too many moving steps.

By gaining an automation tool that builds projects from a template or project ad-hoc ensures that project managers can maintain plans and identify where additional resources may be needed.

The project manager can now quickly:

- Assign milestones and tasks
- Request resources
- View labor
- See the total cost of the project

Clients who use this application:

Spokane Regional Health

Hinshaw & Culbertson Law

Smithville Communications

Court Square Group

NITRO Applications are built for integration with Office 365, Teams & SharePoint. These applications...

...drive productivity and efficiency at organizations around the world.

...are practical tools that solve real business problems.

Crow Canyon's goal is to engage users, streamline operations, and power continuous improvement with its applications, including:

AN INTEGRAL PROCESS FOR YOUR COMPANY'S SUCCESS

Social collaboration and project management are merged in Crow Canyon Project Management, letting project participants interact in real-time through project-specific conversations in Office 365, and collaboratively upload and review documents.

The main advantage of Crow Canyon project management is that it helps you to manage your projects effectively, enabling you to resolve problems more quickly.

PART OF CROW CANYON'S FAMILY OF BUSINESS PROCESS AUTOMATION TOOLS

Incredible ROI: Built on Microsoft SharePoint, Crow Canyon Software is quick to deploy, easy to use, and low cost. ROI is a matter of weeks.

High User Acceptance: Because it is built upon Microsoft SharePoint, the user interface is familiar and easy to access.

Automate Service Tracking: Track and automate requests for IT services. Requests can be made via SharePoint, web, or phone.

Improve Service, Lower Costs, Raise Productivity: Chaotic emails drain productivity and increase employee frustration. Eliminate manual processes. Automate request processing across your organization.

Track All Types of Services: IT Support Requests, New Equipment Requests, Password Resets, On-boarding, Server Moves, Upgrades and Patches, and many more...

POWERFUL FEATURES

Adopt an agile methodology for your process

View all projects in a roll-up visual dashboard

Approve clearly via department, cost, and level

Facilitate collaboration through MS Teams

Track projects, milestones, and tasks in real-time

Drive task completion through SLA's

Configure Forms and Workflows specific to you

Create Gantt charts, sprint, and burndown reports
